

BR200 SURFACE CLEANER

FOR EASY CLEANING OF SURFACES

Cleantecs
QUALITY. MADE IN GERMANY

EASY CLEANING OF SURFACES

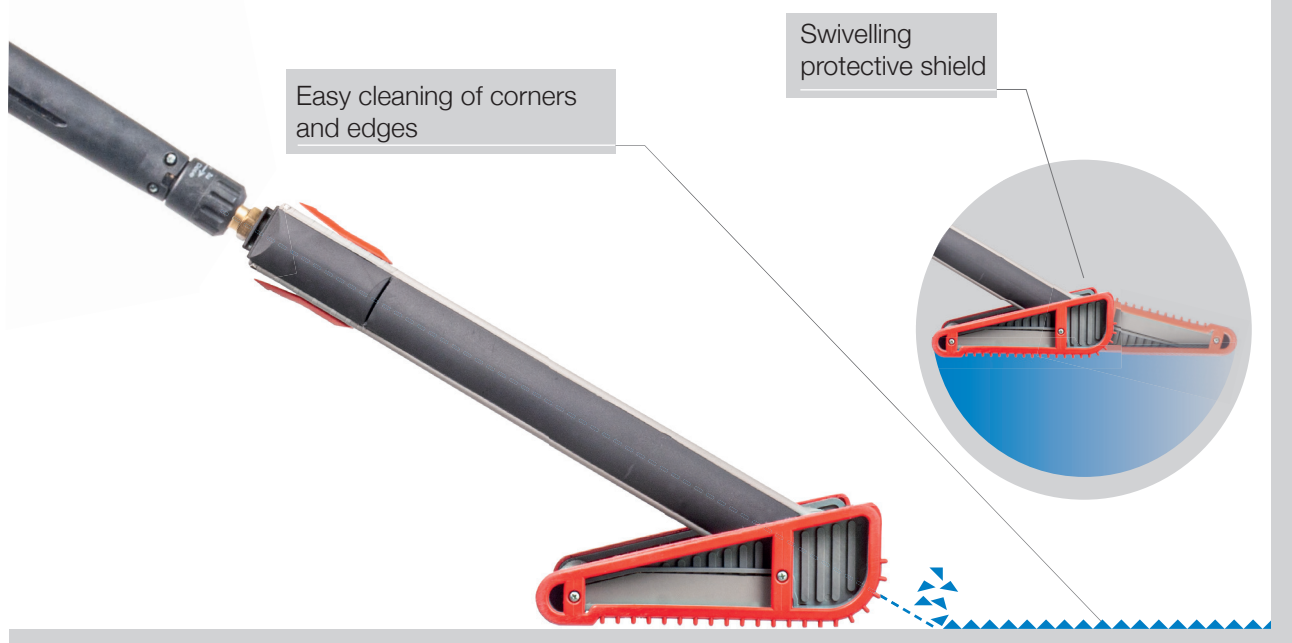

The BR200 SURFACE CLEANER is a linear floor cleaner with unique features that offers enormous performance in terms of lightness, manoeuvrability and efficiency. The BR200 SURFACE CLEANER is equipped with a pendulum jet nozzle and has a cleaning width of 250 mm.

Using a linear cleaning technique, the coarse dirt is pushed in front of it like a spatula to collect it in a suitable place for subsequent disposal.

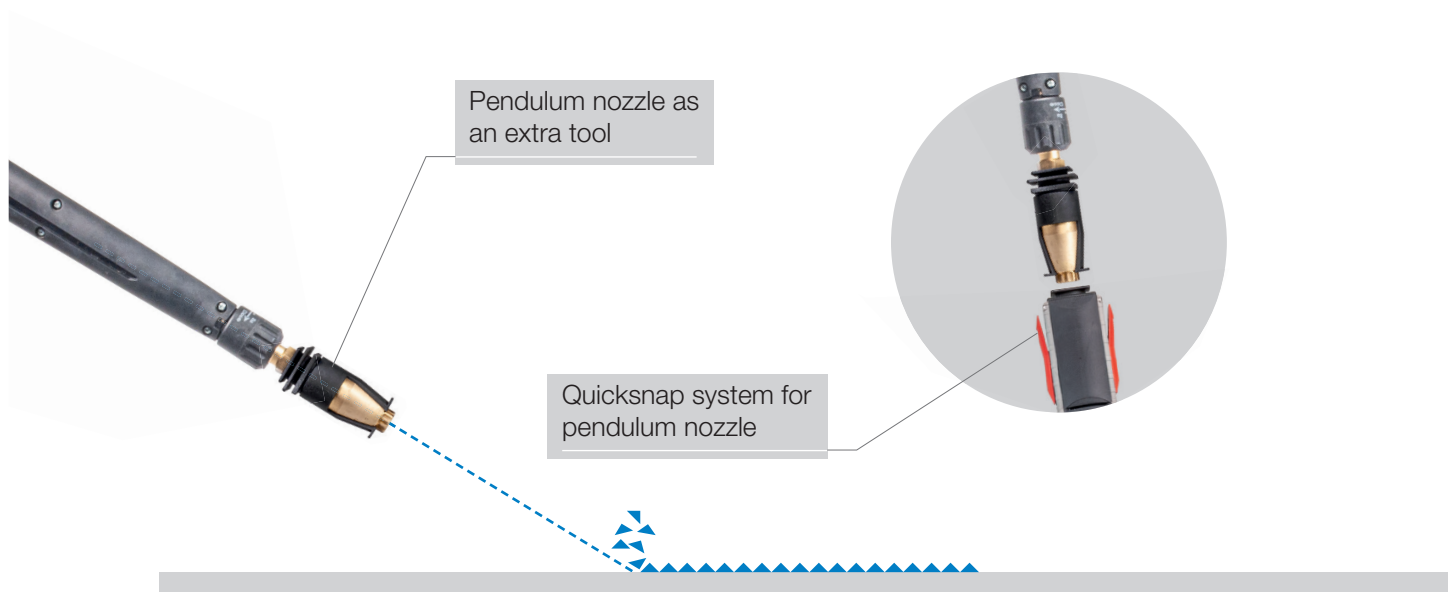

A QUICKSNAPSYSTEM allows the housing to be separated from the cleaning unit. The separation of the two main components provides a high degree of flexibility and makes it easier to clean the most difficult corners and edges.

The protective shield protects people and objects from soiling caused by rebounding cleaning water. Only high-quality materials, such as stainless steel, brass and extremely robust plastic, have been used for the BR200 SURFACE CLEANER.

FLEXIBILITY FOR PERFECT RESULTS

TWO IN ONE

CONTROL OVER DIRT

SPECIAL FEATURES

- ▶ Ceramic nozzle sealing parts
- ▶ Lightweight and robust
- ▶ Protective shield for clean working
- ▶ Easy cleaning of corners and edges
- ▶ Cleaning nozzle can be removed for free cleaning
- ▶ No uncontrolled distribution of loosened dirt
